Senior Front-End Web Developer | React, Accessible UI, REST APIs

Senior Front-End Web Developer with 14+ years of experience modernizing legacy web applications while managing and delivering day-to-day content across enterprise CMS platforms, including landing pages, product content, campaigns, and editorial updates. Experienced building accessible, responsive, API-driven solutions across modern JavaScript frameworks including React, internal tooling, and enterprise content systems, with a strong background collaborating with product owners and cross-functional teams to deliver UX-focused applications in Agile environments using AI-assisted development tools.

WORK EXPERIENCE

Phoenix Contact, USA

Lead Web Developer | 2020–2025

Core contributor to the U.S. public website, customer portal, internal intranet, and marketing email systems for a global industrial automation company, partnering with cross-functional and international teams to deliver accessible, brand-compliant web solutions.

- Led modernization of internal web applications and enterprise platforms, building accessible, responsive, API-driven tools to support HR, Legal, Sales, and Marketing teams.
- Directed complete overhauls of HR and Legal intranet sites for 1,000+ employees, reorganizing content and improving UX, resulting in a 30% increase in resource usage and a 25% reduction in support requests.
- Designed and built a customer portal training video hub integrating event data, calendars, and archives, increasing seminar attendance by 20% and video engagement by 15%.
- Developed internal applications including a lead import and CRM bridge tool to process thousands of records, eliminate duplicates, and export clean datasets in XLSX/CSV format.
- Created an email marketing calendar application enabling Sales and Marketing teams to coordinate campaigns visually, driving a 20% increase in engagement and a 10% decrease in unsubscribe rates.
- Initiated and led development of an email preference center in collaboration with vendors, reducing full unsubscribes through opt-down options and resolving long-standing accidental unsubscribe issues.
- Created and presented an AI safety briefing to executives, leading to a company-wide AI training program; co-founded the AI Committee to explore practical, ethical uses of generative AI and guide internal adoption.
- Built a VR product demo to prototype emerging customer experiences, leading to a full tradeshow deployment and increased booth engagement at national events.

Web Developer | 2011–2020

Core contributor to the U.S. public website, customer portal, internal intranet, and marketing email systems for a global industrial automation company, collaborating with cross-functional and international teams to deliver accessible, brand-compliant digital experiences.

- Managed day-to-day content delivery across enterprise CMS platforms, including campaign landing pages, product updates, white papers, case studies, and news releases, supporting marketing and sales initiatives.

- Maintained and enhanced internal intranet systems and CMS environments, supporting content migrations, performance improvements, and accessibility upgrades.
- Developed HTML/CSS email templates aligned with global brand standards, improving accessibility for screen reader users and modernizing company-wide email communications.
- Partnered with stakeholders across Marketing, Sales, HR, and Legal to translate business needs into web content, internal tools, and digital experiences.
